

The Gorman-Rupp Company

ReliaSource 8 x 12 Above Ground Lift Stations

The Gorman-Rupp Company ReliaSource 8 x 12 packaged pumping system is the latest addition to the company's line of fully engineered, assembled and tested lift stations. The new configuration accommodates Gorman-Rupp Super T Series, Ultra V Series or VS Series pumps, and features interior walls that allow for more sophisticated controls than with 6 x 6 and 7 x 10 package configurations. Side access panels and a removable roof provide for easy maintenance of station components.

Developed with input from Gorman-Rupp distributors and representatives, the new systems can be an affordable alternative to using modular enclosures in many situations. The package is NFPA 820 compliant and is the first new product released bearing the ReliaSource brand name by Gorman-Rupp.

The ReliaSource name applies to pumping systems that are completely designed and manufactured by Gorman-Rupp, guaranteeing a fully-tested system that is entirely warranted by the manufacturer.

Specifications

Size:	2" (50 mm), 3" (75 mm), 4" (100 mm), 6" (150 mm), 8" (200 mm)
Max Capacity:	2,400 GPM (151 lps)
Max Head:	250' (76 m)
Horsepower:	Up to 100 HP

Features

NidaFusion STO

Stations enclosures are aesthetically pleasing, provided in standard forest green color which blends in with the environment. The fiberglass enclosure is manufactured with NidaFusion STO for flexural strength, excellent fatigue and delaminating resistance. NidaFusion STO complexes are composed of a sheet of closed-cell foam, covered with a reinforcing fiber layer on each side. These three elements are linked together by fiberglass bridging strands, which go through them obliquely, forming a triangular truss network. NidaFusion STO is a product of Nida-Core Corp.

Specifications are subject to change. Please contact your Gorman-Rupp Distributor for more details.
