

The Gorman-Rupp Company

Base Mounted Lift Stations

Gorman-Rupp base mounted pump lift stations are pre-engineered units with an extensive selection of pumps, motors, controls, piping and accessories. Gorman-Rupp has many standard designs for new installations, or we can custom design for existing installations with minimum hook-up time. Base mounted pump stations are available with 2", 3", 4", 6", 8" or 10" T Series or Super T Series pumps to match system requirements. For consistently heavy flows, a third or fourth pump may be added. Flows shown are for single pump operation. For high head/low flow, we offer standard staged designs.

Specifications

Size:	3" (75 mm), 4" (100 mm), 6" (150 mm), 8" (200 mm), 10" (250 mm)
Max Capacity:	3,200 GPM (202 lps)
Max Solids:	3" (76 mm)
Max Temperature:	160 F (71 C)

Features

Single Source Responsibility

Gorman-Rupp designs, engineers and manufactures the entire pumping system to ensure that the system meets your requirements and performs reliably year after year. If there is a problem with the system you only have to make one call. Gorman-Rupp is responsible for the entire system, from pumps and controls to the lights and fans in our enclosures.

Super T Series Pumps

Gorman-Rupp self-priming centrifugal solids-handling Super T Series pumps are specifically designed for sewage and industrial wastewater handling applications. The heavy-duty construction and easy-to-service design have made Gorman-Rupp T Series pumps the standard of the industry.

Controls

The Gorman-Rupp team of electrical, mechanical and hydraulic engineers work closely throughout the development of each pumping system to ensure that the entire hydro-electrical system works in harmony to meet your system requirements – accurately and reliably. All Gorman-Rupp controls are manufactured of the highest quality components and are available U.L. and C.S.A. listed (not standard).

Specifications are subject to change. Please contact your Gorman-Rupp Distributor for more details.
