

PRIMING-ASSISTED PUMPS

PRIME AIRE PLUS®

Prime Aire Plus® pumps are configured for Tier IV engines and the latest EISA electric motors.

Prime Aire Plus® pumps employ the same venturi/compressor priming system as the Prime Aire® line. Increased head, flow and enhanced maintenance features are additional benefits of Prime Aire Plus pumps. Models feature sizes up to 8 inches and are suitable for both clear liquids and liquids containing large solids. All PAH Series™ pumps are available coupled to the latest EPA Tier compliant engines or premium efficiency electric motors.

Product information is subject to change; consult factory for details.

PAH Series™ pumps work relentlessly in the most demanding conditions.

FEATURES AND BENEFITS

- Externally adjustable running clearances (on solids-handling models)
- Integral seal oil chamber
- Ductile iron body and impeller
- Two lip seals and atmospheric vent to assure bearing protection
- Oil-lubricated versus grease-lubricated bearings
- Ability to fit other pumping installations
- Fuel level monitoring system (on Interim Tier IV engine-driven models)
